Kiwi Fence Training School

Kiwi Fence Training School is for those who want to learn how to install agricultural fencing, expand service options or improve skills. Taught by well-known and respected professionals in the industry, the school offers the latest in installation techniques and building options.

Hands-On

It will be two days of fast paced hands-on training. We will go outside (regardless of weather, so come prepared), to build high-tensile fence, woven wire as well as Hotcote, Horsecote and Horserail fences.

Estimating

You will gain the knowledge needed to issue a proper estimate. We'll discuss the cost differences of short fences versus longer runs. Learn how to incorporate all costs into the equation.

Building a Successful Business

A successful business is more than just building the fence; it takes time, dedication and hard work. We will review the importance of record keeping, customer service, proper insurances and other aspects to ensure success.

It has been said "Time is Money" - the fact of the matter is the time and money you spend for training will repay you far into the future.

The Choice of Professional Contractors

Tentative Agenda

Day 1

- Posts
- High-Tensile Basics
- Bracing
- Physical Barriers vs Psychological Barriers
- Electric Fencing
